

## [2017 New Lead2pass Latest 70-697 PDF Guarantee 100% Pass 70-697 (188-193)]

2017 May Microsoft Official New Released 70-697 Dumps in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed!

Lead2pass has updated the latest version of Microsoft 70-697 exam, which is a hot exam of Microsoft certification. It is Lead2pass Microsoft 70-697 exam dumps that give you confidence to pass this certification exam in first attempt and with maximized score. Following questions and answers are all new published by Microsoft Official Exam Center: <http://www.lead2pass.com/70-697.html>

QUESTION 188 You administer Windows 10 Enterprise client computers in your company network. A computer that is used by non-administrator users has a directory named C:Folder1. A shared collection of Microsoft Excel files is stored in the C:Folder1 directory, with non-administrator users being granted modify permissions to the directory. You discover that some files have been incorrectly modified by a user. You need to determine which users are making changes to the files in the directory. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Set local policy: Computer Configuration > Windows Settings > Security Settings > Local Policies > Audit Policy > Audit object access to Failure.

B. From the Auditing Entry for Folder1, set the Principal to Everyone, and then set the Type to Failure for the Modify permission.

C. From the Auditing Entry for Folder1, set the Principal to Guests, and then set the Type to Success for the Modify permission.

D. Set local policy: Computer Configuration > Windows Settings > Security Settings > Local Policies > Audit Policy > Audit object access to Success.

E. From the Auditing Entry for Folder1, set the Principal to Guests, and then set the Type to Failure for the Modify permission.

F. From the Auditing Entry for Folder, set the Principal to Everyone, and then set the Type to Success for the Modify permission.

Answer: DF

QUESTION 189 You provide IT support for a small startup company. The company wants users to have Read and Write permissions to the company's shared folder. The network consists of a workgroup that uses Windows 10 Enterprise computers. You add each user to a group named NetworkUsers. You need to grant permissions to the share. You have the following requirements:

- All users must have Read and Write access to existing files.
- Any new files must allow the creator to modify the new file's permissions.

Which two actions should you take? Each correct answer presents part of the solution.

A. Grant Modify permissions to the NetworkUsers group on the shared folder.

B. Grant Full Control permissions to the Domain Admins group on the shared folder.

C. Grant List and Execute permissions to the NetworkUsers group on the shared folder.

D. Grant Full Control permissions to the Creator Owner group on the shared folder.

Answer: AD

QUESTION 190 You are the desktop administrator for a small company. The company modifies its policy for retaining company financial documents from six months to three years. You currently use File History, retaining files for six months and saving copies of files every 20 minutes. You need to adjust your current backup solution to accommodate the policy change. What should you do?

A. Set the Keep Saved Versions option in File History to Forever.

B. Set the backup solution to Recovery model.

C. Set the Save Copies of Files frequency to Daily.

D. Set the File History log file setting to Archive the log when full, do not overwrite events.

Answer: A

QUESTION 191 You have a computer that runs Windows 10 and has BitLocker Drive Encryption (BitLocker) configured. You need to change the BitLocker PIN for the drive. What should you run?

A. the bitsadmin.exe command

B. the Enable-BitLocker cmdlet

C. the Add-BitLockerKeyProtector cmdlet

D. the Set-PcdvDeviceUserPassword cmdlet

Answer: C

QUESTION 192 You have a Microsoft Intune subscription. You create two compliance policies named Comp1 and Comp2. You create a configuration policy named ConfigPol1. The settings in each policy do not conflict with other policies. Comp1 has low security settings. Comp2 has medium security settings. ConfigPol1 has high security settings. You have a device named Device1. Device1 is a member of groups that have Comp1, Comp2 and ConfigPol1 applied. You need to identify which policies will be enforced on Device1. What should you identify?

A. Comp1 only

B. Comp2 only

C. Comp1, Comp2 and ConfigPol1

D. Comp1 and Comp2 only

E. Comp1 and ConfigPol1 only

F. ConfigPol1 only

G. Comp2 and ConfigPol1 only

Answer: C

QUESTION 193 Your network contains an Active Directory domain named contoso.com. All client computers run Windows 10 Enterprise and Microsoft Office 2013. All of the computers are joined to the domain. Your company purchases a subscription to Office 365. An administrator creates an Office 365 account for each user and deploys a federated solution for Office 365. You need to prevent the users from being prompted for a user account and a password each time they access services from Office 365. Which account should you instruct the users to use when they sign in to their computer?

A. a Microsoft account

B. a local user account

C. an Office 365 account

D. a contoso.com account

Answer: D
