Answer: Case Study 4 - Contoso, Ltd (QUESTION 70 - QUESTION 75)Current environmentOverviewYou are the SharePoint administrator for a manufacturing company named Contoso, Ltd. You have the following environments: Each site collection uses a unique content database. DetailsDallasYou configure a My Sites host site collection at the URL http://Dallas.contoso.com/personal. The Dallas site collection also hosts a web application that will be used exclusively by sales department employees for creating customer sites. Employees access the site at the URL http://customer.contoso.com. ChicagoThe Chicago location has a primary datacenter and a secondary datacenter. DenverSome of the sites in the Denver site collection run in SharePoint 2010 mode. Atlanta The Atlanta site collection is used exclusively by marketing department employees. DetroitThe development site collection is used only by SharePoint administrators for internal testing. SeattleThe IT site collection is used by the IT department to share content with other employees. The following servers are available in the Seattle datacenter:Server1 and Server5 are located in the Seattle perimeter network. End users have direct access only to these servers.Server2 and Server6 are optimized for high throughput.Server3 and Server7 have storage that is optimized for caching.Server4 and Server8 are not currently in use. The servers in the Seattle datacenter are not configured for redundancy. Office 365You have an existing Office 365 tenant. You use Azure Active Directory Connect to provision the hosted environment. RequirementsChicagoYou identify the following requirements for the Chicago office: General requirementsChicago must remain a standalone on-premises SharePoint environment. There must be no connectivity with Office 365.You must deploy a new Office Online Server farm named oos-chi.contoso.com to the environment. This farm will be used from within the network and externally. All connections to the Office Online Server farm must use IPSec. Disaster recovery requirementsYou must use thesecondary datacenter in Chicago for disaster recovery.You must be able to recover the Chicago.contoso.com SharePoint farm to the secondary datacenter. Any recovery operations must complete in less than five minutes if the primary datacenter fails.You must minimize the costs associated with deploying the disaster recovery solution. DallasYou identify the following requirements for the Dallas office: General requirementsYou must configure the Dallas SharePoint farm as a hybrid environment with the Office 365 tenant.You must support OneDrive for Business, Site following, Profiles, and the Extensible app launcher.You must minimize the number of servers that you must add to the environment.You must grant users only the minimum permissions needed.You must ensure thathttp://dallas.contoso.com/personalsite is only used for employee personal sites. Only farm administrators are permitted to create site collections in the http://Dallas.contoso.comweb applications. Requirements for sales department employeesSales users must be able to create child sites under thehttp://customer.contoso.comweb application.Sales users must be able to create site collections. SeattleYou must implement a new SharePoint environment. Employees in the IT department will use the environment to share content with other employees. You identify the following requirements for the Seattle office: General requirementsYou must configure the farm by using MinRole.You must implement redundancy.Employees must be able to search allcontent in the farm. Office 365-specific requirementsYou must support only OneDrive for Business and Profiles. You must minimize the number of servers that you must add to the environment. Other requirementsAtlantaYou must deploy a new SharePoint farm at the Atlanta office. The farm must meet the following requirements:The farm must be highly available.Operating systems must support file system encryption.Search databases must be stored on a file system that automatically repairs corrupt files. Content databases must be stored on file systems that support the highest level of scalability. BostonYou must upgrade the existing SharePoint farm to SharePoint 2016. Employees who use the farm must be able to continue using the farm during the upgrade process. DenverYou must perform a database check before you upgrade SharePoint. SQL ServerAll SharePoint environments must use dedicated SQL Servers.The Atlanta SharePoint farm must use SQL AlwaysOn and a group named SP16-SQLAO.The Atlanta SQL environment must use a SQL alias named SQL. Office 365You must use Active Directory Import to synchronize any on-premises SharePoint environments with the Office 365 tenant. QUESTION 70You need to ensure that sales department users can create sites.You grant sales department users the Full Control permission for the http://Dallas.contoso.com/sites/Sales site.Does the solution meet the goal? A. YesB. No Answer: BExplanation:Wrong URL. Sales users must be able to create child sites under thehttp://customer.contoso.comweb application.
